

Section	Ask	Points	What good looks like	What average looks like	What poor looks like	What nothing looks like	% Weightage
		60	80-100%	60-80%	<60%		92.50%
Understanding the structure of the data	- Answer all the key questions asked in this section	5	- Correct answers to all the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.	- Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.	- Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.		7.50%
Univariate Data Analysis	- Explore all the variables and provide observations on the distributions of all the relevant variables in the dataset - Answer all the key questions asked in this section	15	- Univariate Analysis (boxplots, histograms, countplots, distribution plots for all important variables like 'Age', 'Gender', 'Profession', 'Make', 'Price', 'Salary', 'Education', 'Total_salary', 'Personal_loan', 'House_loan', etc.) - Correct answers to all the key questions asked in this section (for Question 7 and Question 8) *Marks for key questions to be given based on how many were answered correctly.	- Univariate Analysis (boxplots, histograms, countplots, distribution plots for some important variables) with insights - Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.	- Univariate Analysis (any plot) with no insights - Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.		25.00%
Multivariate Data Analysis	- Perform bivariate/multivariate analysis to explore relationships between the important variables in the dataset - Answer all the key questions asked in this section	20	- Bivariate Analysis (Correlation matrix, relationship between the important variables) along with detailed insights for each of them - Correct answers to all the key questions asked in this section (for Question 10 and Question 11) *Marks for key questions to be given based on how many were answered correctly.	- Bivariate Analysis (Correlation matrix, relation between some of the important variables) along with detailed insights - Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.	- Bivariate Analysis (any plot) with no insights - Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.		37.50%
Quality & Use of visualizations	- Use proper visualizations for the analysis and provide observations on the plots	6	All the visualizations should have: 1) Clear visibility 2) All the axes labelled 3) Suitable scale of axes 4) Use of hue parameter for colour encoding	All the visualizations fulfill any 3 of the 4 requirements	Any 1 requirement is fulfilled		7.50%
Conclusion and Recommendations	- Conclude with the key insights/observations	6	- 4-5 business insights based on the analysis	- Any 2-3 business insights based on the analysis	- Any point of business insights based on the analysis		7.50%

Presentation/Notebook - Overall quality	- Structure and flow - Crispness - Visual appeal - All key insights and recommendations covered? OR - Structure and flow - Well commented code - All key insights and recommendations covered?	8	- Clear structure and flow - everything sits well in a story - (Problem - Data overview - Solution overview - Findings - Recommendations) - Crispness - not too many words - just enough to keep the focus on key things/points - Visual appeal - use of charts, colors, diagrams, format, symmetry - informative visualizations that are easy to interpret - All key insights and recommendations covered - all key ones from EDA are stressed upon & important insights are not left just in the notebook. clear points on what business should do with this model and how will that be beneficial (These are key to differentiating a good and an excellent solution) OR - Well structured notebook with a logical flow - Clean and well commented code	- There is structure and flow but some bits are missing / jumbled - Points are made but in too many words - lesser charts, format is not the cleanest - key insights are covered but some points are missed, like actionable recommendations OR - There is structure and flow but some bits are missing - Some of the code is commented	- No structure or flow - Only a few points are covered - story is not complete - Not many visuals used - Final insights and recommendations are missing OR - No structure or flow - No comments in the code	- No presentation OR - No code	7.50%
Important Notes for the Evaluator							
- Learners have an option to choose between notebook submission or presentation submission. - Grading for all sections except Presentation/Notebook Overall Quality will be the same for both types of submission. - In Presentation/Notebook Overall Quality, rubric comments are separated for Presentation and Notebook using the word OR
