

Section	Ask	Points	What good looks like	What average looks like	What poor looks like	What nothing looks like	Weightage
		60	80-100%	60-80%	<60%	0	100.00%
Understanding the structure of the data	- Answer all the key questions asked in this section (5 marks)	5	- Correct answers to all the key questions asked in this section (For Question 1 [0.5], Question 2 [0.5], Question 3 [1], Question 4 [2], and Question 5 [1]) *Marks for key questions to be given based on how many were answered correctly.	- Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.	- Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.		8.33%
Univariate Data Analysis	- Explore all the variables and provide observations on the distributions of all the relevant variables in the dataset (9 marks) - Answer all the key questions asked in this section (6 marks)	15	- Univariate Analysis (explored 8 to 9 variables) with insights (Q6) [9] - Correct answers to all the key questions asked in this section (for Question 7 [1], Question 8 [1], Question 9 [2], Question 10 [1], and Question 11 [1]) *Marks for key questions to be given based on how many were answered correctly.	- Univariate Analysis (boxplots, histograms, countplots, distribution plots for some important variables) with insights - Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.	- Univariate Analysis (any plot) with no insights - Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.		25.00%
Multivariate Data Analysis	- Perform bivariate/multivariate analysis to explore relationships between the important variables in the dataset and provide observations on these relationships (10 marks) - Answer all the key questions asked in this section (10 marks)	20	- Bivariate Analysis (Correlation matrix, relationship between the important variables for at least 6 combinations), along with detailed insights for each of them (Q12) [10] - Correct answers to all the key questions asked in this section (for Question 13 [3], Question 14 [3], Question 15 [2], and Question 16 [2]) *Marks for key questions to be given based on how many were answered correctly.	- Bivariate Analysis (Correlation matrix, relation between some of the important variables) along with detailed insights - Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.	- Bivariate Analysis (any plot) with no insights - Correct answers to some of the key questions asked in this section *Marks for key questions to be given based on how many were answered correctly.		33.33%
Quality & Use of Visualizations	- Use proper visualizations for the analysis and provide observations on the plots	6	All the visualizations should have: 1) Clear visibility [2] 2) All the axes are labeled [2] 3) Suitable scale of axes [1] 4) Use of the hue parameter for colour encoding [1]	All the visualizations fulfill any 3 of the 4 requirements	Any 1 requirement is fulfilled		10.00%
Conclusion and Recommendations	- Conclude with the key insights/observations	6	- 4-5 business insights based on the analysis (Q17) [6]	- Any 2-3 business insights based on the analysis	- Any point of business insights based on the analysis		10.00%

Presentation/Notebook - Overall Quality	- Structure and flow - Crispness - Visual appeal - All key insights and recommendations covered?	8	- Clear structure and flow - everything sits well in a story - (Problem - Data overview - Solution overview - Findings - Recommendations) [2] - Crispness - not too many words - just enough to keep the focus on key things/points [2] - Visual appeal - use of charts, colors, diagrams, format, symmetry - informative visualizations that are easy to interpret [2]	- There is structure and flow but some bits are missing / jumbled - Points are made but in too many words - lesser charts, format is not the cleanest - key insights are covered but some points are missed, like actionable recommendations	- No structure or flow - Only a few points are covered - story is not complete - Not many visuals used - Final insights and recommendations are missing	- No presentation OR - No code	13.33%
	OR - Structure and flow - Well commented code - All key insights and recommendations covered?		- All key insights and recommendations covered - all key ones from EDA are stressed upon & important insights are not left just in the notebook. clear points on what business should do with this model and how will that be beneficial [2] (These are key to differentiating a good and an excellent solution) OR - Well structured notebook with a logical flow [4] - Clean and well commented code [4]	OR - There is structure and flow but some bits are missing - Some of the code is commented	OR - No structure or flow - No comments in the code		

Important Notes for the Evaluator

- Learners have an option to choose between notebook submission or presentation submission.
- Grading for all sections except Presentation/Notebook Overall Quality will be the same for both types of submission.
- In Presentation/Notebook Overall Quality, rubric comments are separated for Presentation and Notebook using the word OR
