

Section	Ask	Points	What good looks like	What average looks like	What poor looks like	% Weightage
		60	80-100%	60-80%	<60%	100.00%
Question Answering using LLM	- Load the large language model from Hugging Face - Create a function to define the model parameters and generate a response - Apply the response generation function to get answers to the questions provided in the problem statement - Provide comments/observations for the answers received	8	1) Loaded the large language model from Hugging Face [1] 2) Created a function to define the model parameters and generate a response [2] 3) Applied the response generation function to get answers to the questions provided in the problem statement [2.5] 4) Provided comments/observations for the answers received [2.5]	1) Loaded the large language model from Hugging Face 2) Created a function to define the model parameters and generate a response 3) Applied the response generation function to get answers to the questions provided in the problem statement	1) Loaded the large language model from Hugging Face 2) Created a function to define the model parameters and generate a response	13.33%
Question Answering using LLM with Prompt Engineering	- Apply prompt engineering and LLM parameter tuning (at least 5 combinations) and get answers to the questions provided in the problem statement - Provide comments/observations for the answers received	11	1) Applied prompt engineering and LLM parameter tuning (at least 5 combinations) and get answers to the questions provided in the problem statement [10] - 0.5 marks for finding answer to each question - 1.5 marks for every combination for prompt engineering and LLM parameters tried 2) Provided comments/observations for the answers received [1] Note: All combinations of parameters need not be tried out for all questions.	1) Applied prompt engineering and LLM parameter tuning (2-3 combinations) and get answers to the questions provided in the problem statement 2) Provided comments/observations for the answers received (2-3 questions) Note: All combinations of parameters need not be tried out for all questions.	1) Applied prompt engineering and LLM parameter tuning (at most 1 combination) and get answers to the questions provided in the problem statement Note: All combinations of parameters need not be tried out for all questions.	18.33%
Data Preparation for RAG	- Load the data file provided - Split the data using a text splitter with necessary attributes - Load the embedding model - Load the vector database - Define the retriever with appropriate search method and k value	8	1) Loaded the data file provided [1] 2) Split the data using a text splitter with necessary attributes [2] 3) Loaded the embedding model [2] 4) Loaded the vector database [1] 5) Defined the retriever with appropriate search method and k value [2]	1) Loaded the data file provided 2) Split the data using a text splitter with necessary attributes 3) Loaded the embedding model 4) Loaded the vector database	1) Loaded the data file provided 2) Split the data using a text splitter with necessary attributes 3) Loaded the embedding model	13.33%
Question Answering using RAG	- Get answers to the questions provided in the problem statement - Fine-tune the retriever, and LLM parameters (at least 5 combinations) to check different results - Provide comments/observations for the answers received	12	1) Got answers to the questions provided in the problem statement [2.5] 2) Fine-tuned the retriever, and LLM parameters (at least 5 combinations) to check different results [7.5] 3) Provided comments/observations for the answers received [2]	1) Got answers to the questions provided in the problem statement (2-3 questions) 2) Fine-tuned the retriever, and LLM parameters (2-3 combinations) to check different results 3) Provided comments/observations for the answers received (2-3 questions)	1) Got answers to the questions provided in the problem statement (2-3 questions) 2) Fine-tuned the retriever, and LLM parameters (at most 1 combination) to check different results	20.00%
Output Evaluation	- Define the evaluation prompt for groundedness - Define the evaluation prompt for relevance - Evaluate all the responses for the questions provided in the problem statement - Provide comments on the evaluation output	9	1) Defined the evaluation prompt for groundedness [3] 2) Defined the evaluation prompt for relevance [3] 3) Evaluated all the responses for the five queries [2.5] 4) Comments on the evaluation output [0.5]	1) Defined the evaluation prompt for groundedness 2) Defined the evaluation prompt for relevance 3) Evaluated the responses for the 2-3 queries	1) Defined the evaluation prompt for groundedness or relevance 2) Evaluated the responses for the 2-3 queries	15.00%

Actionable Insights and Recommendations	Key takeaways for the business	4	1) 3-4 Actionable Insights mentioned [4] 2) 2-3 Recommendations mentioned [2] [Recommendations can also include points on additional data sources for further analysis, model implementation in real world, potential business benefits from improving the model, etc.]	1) 1-2 Actionable Insights mentioned 2) 1 Recommendation mentioned	Any Actionable Insights or Recommendations mentioned	6.67%
Presentation/Notebook - Overall quality	- Structure and flow - Crispness - Visual appeal - Conclusion and Business Recommendations OR - Structure and flow - Well commented code - Conclusion and Business Recommendations	8	1) Clear structure and flow - everything sits well in a story [2] 2) Crispness (Not too many words, just enough to keep the focus on key things/points) [2] 3) Visual appeal (Use of charts, colors, diagrams, format, symmetry, informative visualizations that are easy to interpret) [2] OR 1) Well structured notebook with a logical flow [3] 2) Clean and well commented code [3]	1) There is structure and flow but some bits are jumbled 2) Points are made but in too many words 3) Lesser charts, format is not the cleanest OR 1) There is structure and flow but some bits are missing 2) Some of the code is commented * If any section is missing and points have been deducted for the same in a previous section, then no points should be deducted in this section	1) No structure or flow 2) Only a few points are covered, story is not complete 3) Not many visuals used OR 1) no structure or flow 2) no comments in the code	13.33%
